DIRECTIONS FOR USE
Restrictions: DO NOT place in areas that are routinely washed.

SITUATION	PEST	RATE	CRITICAL COMMENTS
Barracks, farm buildings, food processing establishments, factories, homes, hospitals, meatworks (non-product areas), offices, restaurants, schools, shops, storerooms, transport vehicles and facilities.	Small cockroaches e.g. German Cockroach (<i>Blattella germanica</i>)	Light infestations - 1 placement per m ² Heavy infestations - 2 placements per m ² .	Apply gel in out of the way locations where cockroaches occur e.g., under fridges, near water heaters, behind microwave ovens, garbage bins etc. Re-assessment of treated areas one month after initial baiting is recommended to evaluate if additional baiting is required. Bait placements should be replenished when consumed or at least every three months as long as pest populations persist.
	Large cockroaches e.g. American cockroach (<i>Periplaneta spp.</i>)	Light infestations - 2 placements per m ² Heavy infestations - 3 placements per m ² .	<i>Periplaneta spp.</i> require more bait because of the quantity which can be consumed by a single cockroach. Reassess baiting effectiveness as above.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

Do not allow to contact food/livestock, feed or their water. Do not place gel on surfaces where food is prepared or on utensils that are used for food preparation, on food packing materials or on surfaces where food packing materials are stored.

GENERAL INSTRUCTIONS

Apply using a suitable applicator for gel baits. Gel should be applied out of reach of children, pets and other animals. Do not place gel on surfaces which are regularly washed.

INSECTICIDE RESISTANCE WARNING

For insecticide resistance management COVERT Cockroach Gel Bait is a Group 4A insecticide. Some naturally occurring insect biotypes resistant to COVERT Cockroach Gel Bait and other group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if COVERT Cockroach Gel Bait or other group 4A insecticides are used repeatedly. The effectiveness of COVERT Cockroach Gel Bait on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, PCT Holdings Pty Ltd accepts no liability for any losses that may result from the failure of COVERT Cockroach Gel Bait to control resistant insects. COVERT Cockroach Gel Bait may be subject to specific resistance management strategies. For further information, contact your local supplier, PCT Holdings Pty Ltd representatives or local agricultural department agronomist.

PROTECTION OF WILDLIFE FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with gel or used syringes.

STORAGE, SPILLAGE AND DISPOSAL

Keep out of reach of children. Do not store in direct sunlight. Store in the closed, original container in a cool dry place. Completely empty syringe in normal use. Dispose of empty syringe and carton by wrapping in paper, placing in plastic bag and putting in the garbage.

SAFETY DIRECTIONS

Will irritate the eyes. Avoid contact with eyes. Wash hands after use.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.
